# Mission Boundaries

- Watershed Boundaries – 26,000 Square Miles in 5 States
- 328 Miles of Navigable Waterway
- 23 Navigation Locks and Dams
- 16 Multi-Purpose Risk Management Reservoirs
- 700 Employees
- Providing Reliable Inland Navigation for our Nation from the very beginning

# PITTSBURGH DISTRICT VALUE TO NATION

## WHO WE ARE >>>

The **U.S. Army Corps of Engineers** is one of the world's largest public works agencies made up of approximately 37,000 dedicated civilian and military men and women. It is organized by watershed boundaries into nine divisions and 45 subordinate districts.

The **Pittsburgh District**, within the Great Lakes and Ohio River Division, is known as the "Headwaters District" because it includes the upper 127 miles of the Ohio River and all the other rivers, streams and tributaries that ultimately flow into either the Allegheny or Monongahela Rivers, which converge at the Point in downtown Pittsburgh to form the Ohio.

## VISION >>>

Engineering solutions for our Nation's toughest challenges.

## MISSION >>>

Deliver vital public and military engineering services; partnering in peace and war to strengthen our Nation's security, energize the economy and reduce risks from disasters.

### Did You Know? >>>

Up to **70%** of the water converging in downtown Pittsburgh in dry conditions is released from Corps reservoirs.

**US Army Corps of Engineers®**  
**Pittsburgh District**

More than **62 million** tons of cargo valued at over **\$3.4 billion** move through the locks and dams of the Upper Ohio River watershed on an annual basis.

The Pittsburgh District issued more than **3,600 permits** last year in our effort to balance environmental protection with economic security.

More than **6 million people** visit Pittsburgh District lakes each year, generating over **\$200 million** in local economic benefits for our region.

The Pittsburgh District is home to **nine private hydropower facilities** which generate 1 million megawatt hours of energy, enough to power 100,000 homes.

Projects like **North Park Lake** and **Sheraden Park** can improve the environmental quality of streams and lakes throughout the Three Rivers region.

Corps reservoirs augment the water supply of major municipal providers like **West View Water Authority** and the **Pittsburgh Water and Sewer Authority**.

The Corps provides **Temporary Emergency Power Generation, local flood protection assistance** and other services in times of natural disasters or other federal emergencies.

Pittsburgh District reservoirs and local flood protection projects have cumulatively prevented more than **\$16.7 billion** in flood damage since their construction.

# FY21 Contract Accomplishment

- 583 Contract Actions; \$91M in Contract Obligations
- \$20M awarded to Small Businesses; 22.1% of the District's total dollars
- \$46M awarded in support of ACI temporary emergency power contracts
- Completed the East Branch Dam Safety Project
- Awarded multiple VA BIM task orders totaling \$2M to small businesses
- Awarded a \$4.8M construction contract for the Secant Pile Wall at the Montgomery Lock and Dam

# FY22 Priorities

- Enhance reliability for the Nation's infrastructure, water resources & environment
- Safely deliver quality projects on time and within budget
- Expand our partnerships with existing stakeholders and industry

## ❖ Projects

- Replace hydraulics for main & aux chamber at the Emsworth L/D
- Construction of water main extensions in Allegheny County, PA
- Pittsburgh District solicitations can be found on SAM.gov by searching "W911WN"
